Hygrométrie

Température

Qualité de l'air

Particules

Monitor your Indoor Air Quality
Protect your family's health

Environmental data reading and recording
every minute, hour, day and months.

Provide objective measurement of Indoor Air Quality and allows
alarms setting with adjustable levels

Portable with an autonomy of 3 hours minimum

➤ Paramètres techniques

- LCD display with resolution 240 * 320
- Working temperature - 10° ~ 45°, storage - 20 ~ 45°
- humidity: 0% ~ 99%
- Dimension: 146 * 99 * 65 mm
- weight: 225 g
- battery: 2000mAh
- charger USB:5.0V / 500mA.
- Memory: 24 hours

➤ Paramètres mesurés

Formaldéhyde (HCHO)

- measurement range: 0.000 ~ 1.999 mg/m³
- Type of sensor: electrochemical sensors
- unit of measurement: mg/m³ measurement
- accuracy: 0.010 mg/m³
- reaction time: 10 seconds

Temperature and Moisture

- Range : 0°-45°
- Moisture : 0%-99%

Particles PM2.5/PM10

- Particles size : 2.5 µm - 10 Qm
- Reaction time 3 seconds
- Type of sensor : Optical sensors
- Range : 0-999 µg/ m

Volatile Organic Compounds (TVOC)

- measurement range: 0.000 ~ 9.999 mg/m³
- Type of sensor: semiconductor sensors
- unit of measure: mg/m³
- measurement accuracy: 0.010 mg/m³
- reaction time: <10 seconds
